

**Amendments to the Specification**

Please replace the entire paragraph beginning at page 262, line 21 with the following amended paragraph:

On day four, using a ~~300 $\mu$ l~~-300 $\mu$ l multichannel pipetter, aliquot ~~600 $\mu$ l~~  
600 $\mu$ l in one 1ml deep well plate and the remaining supernatant into a 2ml deep well. The supernatants from each well can then be used in the assays described in Examples 14-21.
